

Physics Colloquium

Single-molecule Biophysics of Macromolecular Interactions

Dr. Maria Spies

Professor of Biochemistry

Professor of Radiation Oncology

Carver College of Medicine

University of Iowa

September 5, 2018

4:00 p.m.

114 Begeman Hall

Dr. Spies will talk about the state of the art in the field of single-molecule biophysics and then will focus on their recent works for understanding the fundamental mechanism involved in DNA repair down to the level of individual proteins.

Everyone Welcome! Refreshments Provided.
