

# Physics Colloquium

## **Biological Data: Quantitative Techniques for Analyzing Data and Images from Biological Processes**

**Dr. Ali Tabei**

Assistant Professor, Physics Department  
University of Northern Iowa

**September 19, 2018**

**4:00 p.m.**

**114 Begeman Hall**

Advancements in microscopy and tracking techniques plus recent developments in image processing and quantitative analyzing techniques have provided us with a unique opportunity to investigate subcellular molecular events and extract information from images.

In this talk, I will discuss physicists use theory and computational methods to extract physical and biologically relevant information from biological data.
